

# Three Steps to Finding Breast Cancer Early

## Step 1 Mammograms

Yearly mammograms are recommended starting at age 40 and continuing for as long as a woman is in good health.

# Three Steps to Finding Breast Cancer Early

## Step 1 Mammograms

Yearly mammograms are recommended starting at age 40 and continuing for as long as a woman is in good health.

## Step 2 Breast Exam

Breast exams by your doctor or nurse should be a part of a health exam about every three years for women in their 20s and 30s and every year for women 40 and over.

## Step 2 Breast Exam

Breast exams by your doctor or nurse should be a part of a health exam about every three years for women in their 20s and 30s and every year for women 40 and over.

## Step 3 Breast Self-Awareness

Women should know how their breasts normally look and feel and report any breast change promptly to their doctor or nurse. Breast self-exam is an option for women starting in their 20s.

## Step 3 Breast Self-Awareness

Women should know how their breasts normally look and feel and report any breast change promptly to their doctor or nurse. Breast self-exam is an option for women starting in their 20s.

## Women with Certain Risk Factors

Some women - because of their family history, a genetic tendency, or other certain factors - may need to be tested with MRI in addition to mammograms. (The number of women that fall in this category is small - only about 2% in the USA).

DIA is a proud sponsor of Making Strides Against Breast Cancer. To schedule your breast mammogram, MRI, biopsy, please call us today (302) 369-4DIA.
